## ANTI STICK GLASS

Hydrophobic and Oleophobic surface properties

- For a better visibility:
  - rejects the impurities
  - the process is more controlled
- For a longer life:
  - glass always clean
  - saving costs for spare parts
  - less maintenance

### PERFORMANCE CHARACTERISTICS

- Klinger Original Glasses
- coating of organic material
- tested with water, steam, oils and hydrocarbons
- resistant up to 300 °C (85 bar steam)
- suitable for transparent and reflex glasses and flow indicators
- developed together with a specialized Italian company (patented treatment)
