## Ball segment valve

**Si-101 EN**

Edition: 2012-07

**Type KVT/KVX**
**Wafer design**
**Type KVTF/KVXF**
**Flanged design**
**Nominal pressure**
**PN 50**
**Nominal size**
**DN 25/2 - 65**
**Material**
**Stainless steel**
**High nickel alloy (HiNi)**

- **Control- and shut-off valve**
- **High capacity**
- **Ball segment and shaft made in one piece, gives a torque transmission free of backlash**
- **Excellent tightness irrespective of differential pressure**

The SOMAS ball segment valve type KVT with a centrically mounted shaft, and KVX with an eccentrically mounted shaft are of wafer design. Type KVTF is a flanged version with centrically mounted shaft while KVXF is a flanged and eccentric design.

The valves in this data sheet are of top entry design. Short face to face dimension, low weight and small space requirement make the installation of these valves very easy. One-piece ball segment and shaft design gives backlash-free operation and accurate control. The shaft is guided in the valve body and stuffing box sleeve. The spring loaded seat is available in PTFE, PTFE 53 and HiCo.

The valves can be used for control, as well as for shut-off applications on practically every type of media within a wide temperature range. Choose KVT/KVTF for liquids, media containing impurities etc. For dry and clean media choose KVX/KVXF. In the KVX/KVXF valve the ball segment is eccentrically mounted and rotates out from the seat when the valve is opened. This reduces the wear on seat and segment.

Low noise (LN) trim is available as an option. The designation "LN" indicates that the ball segment is equipped with a network of bars that are used to split up the pressure drop across the valve. This results in less pressure recovery, thereby reducing the noise and potential damage due to cavitation. In addition the "LN" trim can tolerate media containing a small amount of fibers or particles.

Ball segment with V-groove is available for use at high fibre concentrations. The V-groove design prevents de-watering at small opening angles.

SOMAS valves are delivered ready for installation and operation. The valve assemblies are delivered factory tested as complete units with actuators, positioners and accessories.

**Option**

- **KVM-ball segment with V-groove for high fibre concentrations**

- **LN (Low Noise) Ball segment with low noise trim for high ΔP**

## Tightness class

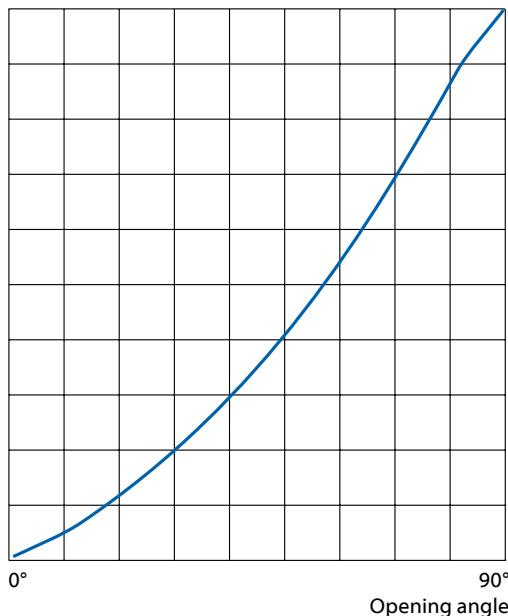

The tightness class is related to the chosen material in the seat ring.

PTFE seat	Code A	EN 60534-4 VI (ASME B16-104 Class VI)
PTFE 53 seat <sup>1</sup>	Code B	EN 60534-4 VI (ASME B16-104 Class VI)
HiCo seat	Code T	EN 60534-4 IV alt. V (ASME B16-104 Class IV alt. V)

<sup>1</sup> 50% PTFE + 50% 1.4435 (316L) powder (percentage by weight)

## Flow characteristics

100% Flow

## Liquid pressure recovery factor Fl

Factor	Opening angle								
	10°	20°	30°	40°	50°	60°	70°	80°	90°
Fl	0.85	0.82	0.80	0.77	0.74	0.71	0.67	0.64	0.60

## Pressure and temperature rating

According to the material in the seat.

Seat Code	Max. working pressure <sup>1</sup> (bar at °C)				
	150°	170°	200°	350°	>350°
A	40	32	—	—	Note 1
B	40	32	15	—	Note 1
T	40	32	25	15	Note 1

10 bar = 1 MPa

Note 1: Check with SOMAS

<sup>1</sup> NB! Do not exceed working pressure for the valve.

## Factor FLP

	Opening angle								
	10°	20°	30°	40°	50°	60°	70°	80°	90°
FLP1	0.85	0.82	0.78	0.75	0.70	0.66	0.60	0.55	0.50
FLP2	0.85	0.82	0.78	0.73	0.68	0.62	0.56	0.50	0.45
FLP3	0.85	0.82	0.78	0.73	0.67	0.61	0.54	0.49	0.43

FLP1 = One dimension bigger pipe size

FLP2 = Two dimensions bigger pipe size

FLP3 = Three dimensions bigger pipe size

## Pipe geometry factor FP

Valve DN	Pipe DN	Opening angle

X = SC – Spring to close

X = SO – Spring to open

For units with the positioner type SP405, add 2 kg

For units with the positioner type SPE405, add 3 kg

## Flange standard

SOMAS ball segment valves type KVT and KVX with nominal size DN 25/2 – 65 are flangeless and should be clamped between flanges.

The valves type KVTF and KVXF with nominal size DN 25/2 – 50 are flanged and can be drilled according to PN 10 - 50 and Class 150/300.

When ordering, please always state the pressure rating of the counter flanges. See the valve specification system on page 8, code 11.

## Torque

Valve DN	Shaft dia. (mm)	Necessary closing torque	
		Min. (Nm)	Max. (Nm)
25/2 - 25	15	25	80
40/32 - 40	15	45	80
50	15	55	80
65	20	120	200

## Further technical information

Technical data for the materials used in the SOMAS valves, flange standard, steam data, etc. can be found in section 6 of the SOMAS catalogue.

## Actuators and accessories

The valves can be fitted with SOMAS manual, on/off or control actuators in accordance with the selection table. The valves will then be delivered as tested units ready for installation.

Check sections 4 and 5 of the SOMAS catalogue, where positioners, limit switches and solenoid valves are also presented.

We can also fit other types of actuators and accessories in accordance with your specification.

## Selection table

Valve DN	Pneumatic actuators								Manual override

## Option

Within the process industry and the energy sector there are a number of applications where process data in combination with standard control valves will end up with problems such as high noise level and erosion. These problems are mostly related to cavitation and high flow velocities inside the valve.

**Note!** By using a standard ball segment valve and add a noise reduction trim many of the above mentioned problems can be solved.

See data sheet Si-108 for more theoretical information.

For controlling suspensions with high fibre concentrations it can be advantageous to use valves with a V-groove to reduce the risk of de-watering at small opening angles.

Capacity factors and remaining factors for valves with LN-trim and valves with V-groove are available in the valve sizing program SOMSIZE.

## Valve sizing

Use SOMAS valve sizing program SOMSIZE to find the correct valve size. All sizing factors are included in the program.

## Ordering

State desired valve according to the valve specification system below as well as type of actuator, positioner and accessories.

### Valve specification system

# Datasheet

## Ball segment valve

**Si-103 EN**

Edition: 2012-07

**Type KVT / KVX****Nominal pressure****Nominal size****Material****Flanged design****PN 10****DN 450 - 700****Stainless steel**

- **Control and tight shut-off valve**
- **High capacity**
- **Ball segment and shaft in one piece gives a torque transmission free of backlash**
- **Excellent tightness irrespective of differential pressure**

The SOMAS ball segment valve type KVT with a centrically mounted ball segment and KVX with an eccentrically mounted ball segment are flanged.

The valve body is diagonally split. Ball segment and shaft are made in one piece.

The spring-loaded seat offers excellent tightness also at low differential pressure.

The valves can be used for control, as well as for shut-off applications, of practically every type of media within a wide temperature range. Choose KVT for liquids, media containing impurities, sludge and chemicals. For dry media such as steam, gases and acids, choose KVX. In the KVX-valve the ball segment is eccentrically mounted and rotates out from the seat when the valve is opened. This reduces the wear on seat and segment.

The SOMAS valves are delivered ready for installation and operation. The valve assemblies are delivered factory tested as complete units with actuators, positioners and accessories.

## Tightness class

The tightness class is related to the chosen material in the seat ring.

PTFE seat	Code A	EN 60534-4 VI (ASME B16-104 Class VI)
PTFE 53 seat <sup>1</sup>	Code B	EN 60534-4 VI (ASME B16-104 Class VI)
HiCo seat <sup>2</sup>	Code T	EN 60534-4 IV or better (ASME B16-104 Class V)

<sup>1</sup> 50% PTFE + 50% 1.4435 (316L) powder (percentage by weight)

<sup>2</sup> HiCo (High Cobalt alloy)

## Pressure and temperature rating

According to the material in the seat.

Seat Code	Max. working pressure <sup>1</sup> (bar at °C)				
	150°	170°	200°	280°	>280°
A	10	8	—	—	—
B	10	10	6	—	—
T	10	10	8	7	Note 1

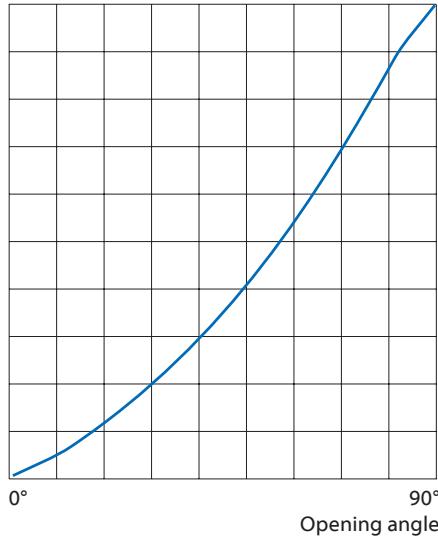

10 bar = 1 MPa

Note 1: Check with SOMAS

**NB!** Do not exceed working pressure for the valve.

## Flow characteristics

100% Flow

## Capacity factor Kv and Resistance factor ξ for ball segment valve type KVT

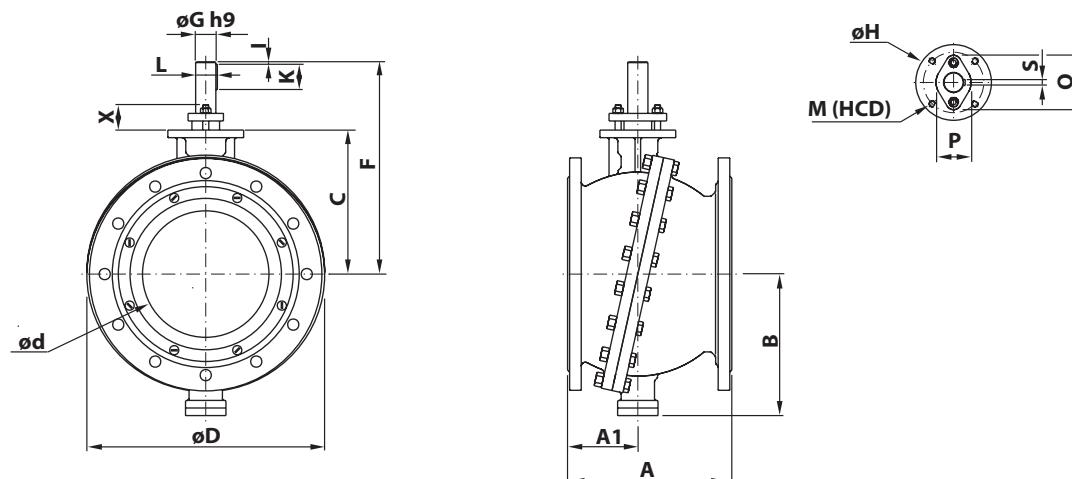

DN	Opening angle									
	10°	20°	30°	40°	50°	60°	70°	80°	90°	ξ 90°
450	434	1099	1909	2902	3934	5225	6575	8388	9640	0,71
500	656	1663	2888	4390	5951	7906	9948	12690	14585	0,47
600	950	2407	4181	6356	8616	11446	14402	18372	21120	0,46
700	1292	3275	5690	8650	11725	15575	19600	25000	28740	0,46

## Capacity factor Kv and Resistance factor ξ for ball segment valve type KVX

DN	Opening angle									
	10°	20°	30°	40°	50°	60°	70°	80°	90°	ξ 90°
450	275	840	1575	2490	3485	4600	5985	7960	9250	0,78
500	415	1275	2380	3765	5275	6960	9050	12040	13850	0,52

Relation between Kv and Cv: Kv = 0.86 x Cv

## Flanged design

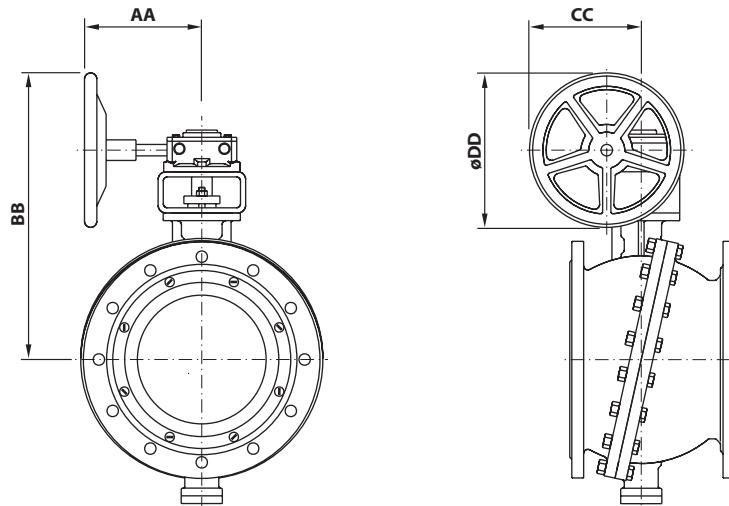

Mounting dimension according to EN 558-1 series 20 and EN 558-2 series 20.

Ball segment valve KVT/KVX, PN 10

DN	A	A1	B	C	ød	øD	E	(F)	øG	øH	I	K	L	M	HCD	O	P	S	X	Weight

## Flanged design

**Ball segment valve, with gear unit**

DN	Type	AA	BB	CC	øDD	Weight
450	M15/F16	330	860	350	430	385
500	MJF/S5	530	1030	400	610	685
600	MJF/S5	530	1130	400	610	820
700	MJF/S5	530	1215	400	610	1290

**Ball segment valve type KVT/KVX with actuator type A-DA**

DN	Type	H	K	N	O	P	R	W	Weight
450	A42	545	560	755	860	210	230	–	440
500	A42	545	560	815	940	210	230	–	630
500	A43	680	–	815	940	280	355	315	725
600	A51	745	–	875	1060	314	354	370	915
700	A51	745	–	960	1145	314	354	370	1385
700	A52	745	760	960	1145	314	354	–	1420

For units with the positioner type SP405, add 2 kg  
For units with the positioner type SPE405, add 3 kg

**Actuator type A-SC/SO**

DN	Type	H	K	N	O	P	R	W	Weight
450	A44-X	925	935	735	860	279	354	–	575

X = SC – Spring to close

X = SO – Spring to open

For units with the positioner type SP405, add 2 kg

For units with the positioner type SPE405, add 3 kg

## Flange standard

SOMAS ball segment valves type KVT and KVX in above mentioned sizes are equipped with flanges which can be drilled for PN10.

Drilling according to ASME is also possible.

When ordering, please state required drilling.

NB! Do not exceed the working pressure for the valve.

## Torque

Valve DN	Shaft dia. (mm)	Necessary closing torque	
		Min. (Nm)	Max. (Nm)
450	60	3000	5000
500	70	4400	8000
600	80	5500	12000
700	100	7000	14000

## Selection table

Valve DN	Shaft dia. (mm)	Pneumatic actuators				Manual override	
		Double acting		Spring return		Hand lever	Gear unit
		5.5 bar	4 bar	Spring to close	Spring to open		
450	60	A42-DA	A42-DA	A44-SC	A44-SC	A44-SO	A44-SOL
500	70	A42-DA	A-43DA				
600	80	A51-DA	A51-DA				
700	100	A51-DA	A52-DA				

## Ordering

State desired valve according to the valve specification system below as well as type of actuator, positioner and accessories.

## Actuators and accessories

The valves can be fitted with SOMAS manual, on/off or control actuators in accordance with the selection table.

The valves will be delivered as tested units ready for installation. See section 3, 4 and 5 of our catalogue, where also actuators, positioners, limit switches and solenoid valves are presented.

We can also fit other types of actuators and accessories in accordance with your specification.

## Further technical information

Technical data for the materials used in the SOMAS valves, flange standard, steam data, etc. can be found in section 6 of the SOMAS catalogue.

## Valve sizing

Use SOMAS valve sizing program SOMSIZE to find the correct valve size. All sizing factors are included in the program.

## Valve specification system

**KVT - L 2 - A K A - A 7 1 - DN... - PN...**

1    2    3    4    5    6    7    8    9    10    11

### 1 Type of valve

Flanged design

KVT (centrically mounted segment)

KVX (eccentrically mounted segment)

### 2 Valve body design

L = Flanged design

### 3 Nominal pressure

2 = PN 10

### 4 Material - valve body

A = CF8M

B = CF8M, hard chromed

### 5 Material - ball segment

K = 2324-12, hard chromed

L = 2324-12, HiCo coated

### 6 Material - seat

A = PTFE (10 % carbon)

B = PTFE 53<sup>1</sup>

T = HiCo (High Cobalt alloy)

### 7 Material - shaft

A = 2324-12

B = 2324-12, hard chromed

### 8 Bearings - valve body/shaft

7 = 1.4539

### 9 Stuffing box

1 = Graphite

2 = PTFE

### 10 Valve size, DN

### 11 Drilling, counter flanges, PN/Class

<sup>1</sup> 50 % PTFE + 50 % 1.4435 (316L) powder (percentage by weight)
